> EASILab

- Part of the Institute of Informatics and the Institute of Energy and Environment at **HES-SO Valais-Wallis** in Switzerland
- Led by **Professor David Wannier**
- Bridge between energy research and user-friendly digital tools

> Visualization Platform - Context

- Developed as part of OpenMod4Africa
- Web GIS application, making geographical data accessible
- Calculation Modules, to run actual models without script nor environment
- Actively developed — new layers, models and features continuously added on the dev platform
- What you're using today is the production release — stable and validated
- Fully open source
